## CME ON MOLECULAR BIOCHEMISTRY

### “CURRENT TRENDS IN MOLECULAR BIOCHEMISTRY”

Molecular Biochemistry is the scientific discipline that seeks to understand the molecular basis of heredity, genetic variation & expression patterns of genes.

Molecular Biochemistry has tremendous application in understanding, diagnosing, prevention & treatment of malignancies, infectious diseases and metabolic disorders. Because of wide application Molecular Biochemistry is soon becoming a pervasive aspect of our technologically based society. Molecular Biochemists believe that a chain of molecules connect each of us with the first living organism, indicating that all of us are connected with each other.

In this backdrop, we from the Department of Biochemistry GIMS, Gadag wish to focus on this emerging field and hence take an opportunity to invite Physicians and Scientists to the CME on current trends in Molecular Biochemistry. GIMS Gadag a happening Postgraduate Institution, a place for research, science and clinical services in its 5<sup>th</sup> year of fruitful existence beacons you.

Reserve your dates on 10<sup>th</sup> May 2019 to be a part of this scientific feast.
