1	Measles Linked Vitamin 'A' [For 9 months Children] (B 16 2 2.1)	One ml of Vitamin 'A' solution containing 1 lakh IU is administered orally to the children of 9 months along with Measles Immunization. Around 12.45 lakh children are target beneficiaries of this programme. This is a routine monthly programme.	Regular	1245663		63732		798901		64%	
2	Vitamin 'A' Supplementation Programme [1 1/2 to 5 years children] (B 16 2 2.1)	This programme is implemented biannually to the children of 1 1/2 to 5 years. 2ml of Vitamin 'A' solution containing 2 lakh IU is administered to the children orally, to improve immunity and reduce morbidity and mortality among pre-school children. Around 49.82 lakh children are Target Beneficiaries of this programme during 2016-17.	Bi-Annual	5004461 (March 2016) 4787499 (September 2016)	140.76		Supply order issued to procure Vitamin 'A' Conc.	4568567 (March 2016) 4321003 (September 2016)		91.3% (March 2016) 90.3 (September 2016)	
3	Mass De Worming (B 16 2 2.2)	This programme was implemented in Karnataka for pre-school children of 1 to 5 years age along with Vitamin 'A' Supplementation Programme. Albendazole tablets are distributed to pre-school children. 1/2 tablet containing 200mg is given to children of 1 to 2 years. And 1 tablet containing 400mg is given to children of 2 to 5 years of age. Around 49.82 lakh children are Target Beneficiaries of this programme during 2016-17. National Deworming Day is celebrated during February and August every year as per GOI Guidelines.	Bi-Annual	3215048 (February 2016) 4097101 (August 2016)	153.52		Albendazole tablets / syrup is already supplied to all the districts of Karnataka.	2929744 (February 2016) 4063613 (August 2016)		90% (February 2016) 99% (August 2016)	
4	Care of Sick Children and Severe Malnutrition (e.g. NRCs, CDNCs, Community Based Programme etc.) (A 2 5)	Nutrition Rehabilitation Centers refers to a unit for 'inpatient, centre based' care of children with severe malnutrition. Children with Severe Acute Malnutrition (SAM) are usually treated either in facility/hospital based care units with / without medical complications. Under nutrition is associated with high rates of mortality and morbidity due to common childhood illness including diarrhoea, acute respiratory infections, malaria and measles. To prevent deaths due to severe acute malnutrition (SAM) specialized treatment and prevention interventions are required. In Karnataka there are 32 Nutrition Rehabilitation Centers. 20 are attached to District Hospitals and 12 are attached to Medical Colleges. Usually they are either 20 bed or 10 bed capacity. They should have a trained Medical Officer, Staff Nurses and Diet Counsellors along with Cook and Attender. Children and mother/care taker will stay for a maximum of 14 days. In addition to providing nutritious food to children, awareness is being created to mothers /care takers on preparation of nutritious food. An amount of Rs 174/- to compensate the loss of wages and Rs 125/- for food of the child and Rs 125/- for mothers food and Rs 125/- for drugs is being provided.	Regular		130.00		54.49	3870		41.85%
